How the Manual Transmission Works

When the driver presses the clutch pedal, it disconnects the engine's power from the wheels, allowing gear changes without stalling or grinding. Moving the gear shifter engages different gear sets within the gearbox, adjusting torque and speed as needed. Releasing the clutch pedal re-engages the engine with the wheels, now transmitting power through the selected gear.

Operating the Manual Nissan Terrano 4x4

Starting the Vehicle

- Ensure the gear lever is in neutral: Confirm by wiggling the shifter; it should move freely.
- Depress the clutch pedal fully: Use your left foot.
- Turn the ignition key: Start the engine.

- Check gauges and indicators: Ensure all systems are normal before proceeding.

Moving Off

- Press the clutch fully again.
- Select first gear: Move the gear shifter into the '1' position.
- Gradually release the clutch pedal while applying gentle throttle: This smooth transition prevents stalling.
- Once moving, continue to accelerate and shift to higher gears as appropriate.

Shifting Gears

- Upshifting: To increase speed, press the clutch, move the shifter to the next higher gear, then release the clutch while applying throttle.
- Downshifting: To slow down or prepare for off-road challenges, press the clutch, shift to a lower gear, then release the clutch smoothly.

Stopping the Vehicle

- Depress the clutch and brake simultaneously.
- Shift to neutral when stationary.
- Release the clutch and brake once stopped.
