- Before Takeoff Checklist

- Takeoff Checklist
- Climb Checklist
- Cruise Checklist
- Descent Checklist
- Approach Checklist
- Landing Checklist
- Shutdown Checklist
- Post-flight Checklist

Each checklist is designed as a sequence of steps that pilots verify, often with specific callouts and confirmations. Some checklists are memory items (ad hoc steps), while others are procedural and must be completed fully.

Pre-flight Checklist: Setting the Stage

The pre-flight checklist initiates the process, ensuring that the aircraft is ready for the upcoming flight. It includes:

- Flight Planning & Documentation: Confirm aircraft documents, weather, NOTAMs, and routing.
- Cabin & External Inspection: Verify aircraft exterior condition, including fuel, tires, and lights.
- Power & Systems Checks: Ensure external power or APU (Auxiliary Power Unit) is available and functional.
- Cockpit Preparation: Power on the aircraft, check electrical systems, and verify configuration.

This phase emphasizes meticulous inspection and preparation, minimizing the chances of overlooked issues.

Before Start Checklist: Cockpit Readiness

Once the aircraft is parked and external preparations are complete, pilots proceed through the 'Before Start' checklist, which typically includes:

- Configuration Checks: Confirm aircraft configuration (flaps, slats, spoilers).
- Fuel & Payload: Verify fuel quantity and distribution.
- Electrical & Hydraulic Systems: Check status messages.
- Navigation & Communication Settings: Input routing, set radios, and configure navigation aids.
- Flight Control Checks: Confirm control surface movements.

This ensures the cockpit environment is correctly configured, and the aircraft is prepared for engine

start.

Start-up Checklist: Powering Up

The start-up checklist guides pilots through engine and systems initialization:

- APU Start & Check: Confirm APU operation for auxiliary power.
- Engine Start: Follow prescribed procedures for engine ignition, monitoring parameters like N2/N1 speeds.
- Systems Checks: Verify hydraulic, electrical, and fuel systems are stable post-start.
- Fire Detection & Suppression: Confirm fire detection systems are armed.

Precise adherence to these steps minimizes engine start issues and system anomalies.

Before Takeoff Checklist: Final Preparations

As the aircraft approaches the runway, the 'Before Takeoff' checklist ensures readiness for departure:

- Speed & Thrust Settings: Set engine thrust levers to takeoff power.
- Flight Instruments & Navigation: Verify correct heading, altitude, and navigation modes.
- Autopilot & Flight Control Laws: Configure autopilot and confirm mode selections.
- Safety & Emergency Equipment: Ensure oxygen masks, emergency lights, and other safety gear are ready.
- Cabin Preparation: Confirm cabin crew are briefed and doors are armed.

This critical phase confirms that all systems are aligned for a safe and efficient takeoff.

Takeoff Checklist: Executing the Launch

During the takeoff roll and initial climb, pilots execute the 'Takeoff' checklist:

- Final Flap & Slat Settings: Confirm correct configuration.
- Engine Parameters: Monitor N1/N2 speeds, EPR (Engine Pressure Ratio), and V-speeds (V1, Vr, V2).
- Speed Checks: Call out and verify speeds during the roll.
- Autothrottle & Autopilot: Engage as required.

- Abort Criteria: Confirm conditions under which a rejected takeoff is necessary.

This phase demands close attention to engine and aircraft performance to ensure safe acceleration and liftoff.

Cruise, Descent, and Approach Checklists

Once airborne, checklists shift focus:

- Cruise Checklist: Monitor systems, fuel, and performance parameters.
- Descent Checklist: Configure aircraft for descent, including descent rate, cabin pressure, and navigation.
- Approach Checklist: Prepare for landing?configure gear, flaps, speed brakes, and verify approach data.

These procedures optimize aircraft performance and situational awareness during the transition phases of flight.

Landing & Post-flight Procedures

The approach and landing checklists ensure a safe touchdown:

- Landing Configuration: Confirm gear down, flaps set, and approach speeds.
