Early Americans mostly identified with their social class in terms of occupation, land ownership, and social mobility. The colonial economy was primarily agrarian, with a small merchant class emerging in port cities like Boston and Philadelphia. These merchants and artisans laid the groundwork for what would later crystallize into a middle class identity.

Post-Revolutionary America saw the rise of a new middle ground—comprising small landowners, shopkeepers, artisans, and professionals—who aspired to upward mobility and economic independence. The American Dream, rooted in notions of landownership and self-sufficiency, became a cultural touchstone for this burgeoning class.
