For example, "think like a detective" or "think like an entrepreneur." This framing is rooted in cognitive psychology and design thinking, emphasizing empathy and perspective-taking as tools for innovation.

Historically, the idea draws from the notion that understanding the thought processes of others can lead to better communication, problem-solving, and decision-making. It is also central to methods such as "role-playing," "empathy mapping," and "mindset shifting," which are employed across education, business, and therapy.

The Psychological Foundations of Thinking Like a

Cognitive Flexibility and Perspective-Taking

At the core of "thinking like a" is cognitive flexibility—the ability to adapt one's thinking to new and different perspectives. This skill involves shifting mental gears, overcoming biases, and considering alternative viewpoints.
